

# EVERY RAIN DROP MATTERS!

The Rose captures and reuses 75% of the rain that falls on our property.

## ROOFTOP RAIN

Rainwater is funneled into an Earth-friendly water collection system.

## HAND PUMP

Pump the handle several times to start water flowing!

## GARDEN CISTERN

Fresh rainwater is stored underground until our gardens need it.

## PERMEABLE PIPES

Our raingardens capture 1/3 of our rainwater, allowing the earth to filter it naturally before it flows into our garden cistern.

## PARKING LOT CISTERN

Dirty driveway runoff is held and slowly released deep underground, where it's filtered naturally. By the time it reaches the Mississippi River, the water is clean!

**WATER IS  
FOR GARDEN  
USE ONLY. DO  
NOT DRINK.**
